

SleepView User Manual

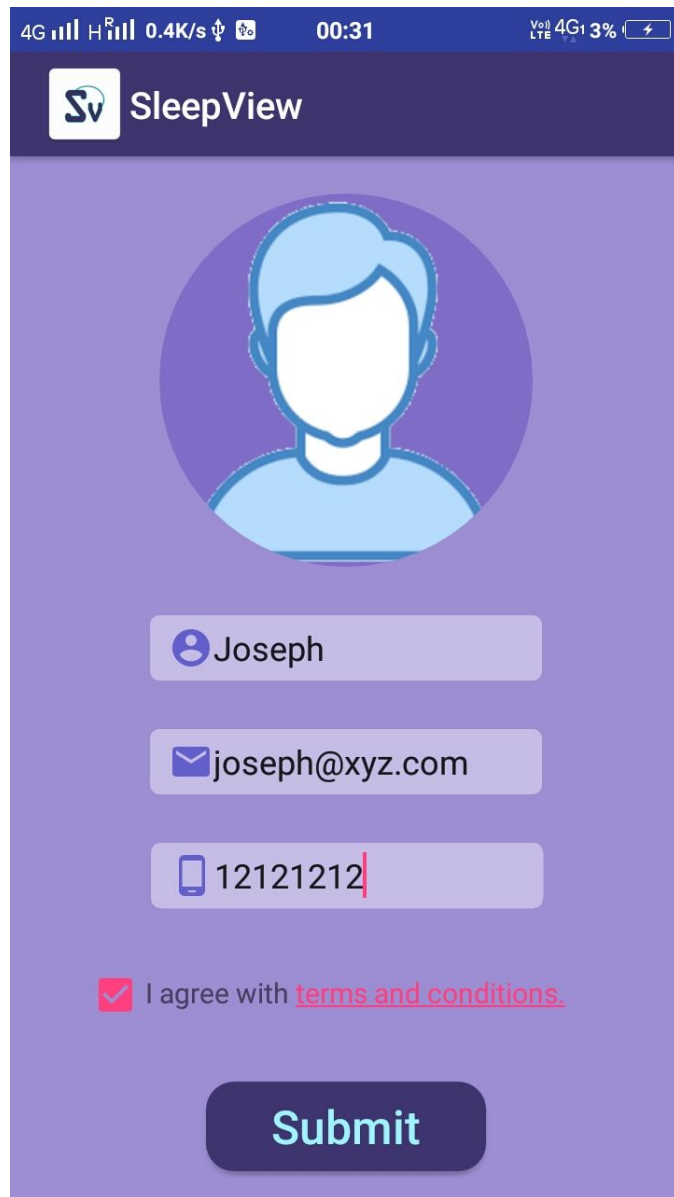

Overview

Omnask Technologies LLC provides SleepView for Android users, which helps to monitor mobile usage habit of an individual. Based on mobile usage user can see their sleep pattern and also user can connect to other devices and can share their mobile usage and sleep pattern.

App Installations and SignUp

After downloading and installing SleepView from Google Play, user needs to create an account with few credentials and that's all you are ready to Go.

The screenshot shows the sign-up interface of the SleepView app. At the top, the status bar displays network status (4G, LTE), signal strength, data speed (0.4K/s), time (00:31), and battery level (3%). The app header features the SleepView logo and name. Below the header is a large circular profile picture placeholder with a blue outline. Underneath the profile picture are three input fields for user information: a name field containing 'Joseph', an email field containing 'joseph@xyz.com', and a phone number field containing '12121212'. Below these fields is a checkbox that is checked, followed by the text 'I agree with [terms and conditions.](#)'. At the bottom of the form is a large, dark blue 'Submit' button.
